

HP-CAST

**HP Consortium for Advanced Scientific and Technical Computing
Scalable Computing Infrastructure (SCI) Organization**

**HP-CAST 13 (Nov, 13 - 14, 2009 – Portland, Oregon)
Worldwide HPC User Group Conference**

Meeting Location:

Hilton Portland & Executive Tower
921 SW Sixth Avenue
Portland, Oregon 97204
Telephone: +1-503-226-1611
<http://www.tourhiltonportland.com/>

Meeting Location

Hilton Portland & Executive Tower

The Hilton Portland & Executive Tower hotel lies in the heart of downtown Portland's financial and entertainment districts within blocks of Portland's hippest restaurants, upscale shopping and major attractions. With its 782 guestrooms in two separate towers, the Hilton Portland & Executive Tower is your premier Northwest business and vacation destination. It's located only one short block from the MAX light rail line, which connects to Portland International Airport as well as points east, west and north of downtown.

A special 'HP-CAST Room Rate' of \$ 135.00 (single or double) is available for attendees who register by 11/02/09. Reference: HP-CAST

What is HP-CAST?

HP-CAST is an organization of HP customers and partners who provide input to HP to increase the capabilities of HP solutions for large-scale, scientific and technical computing. HP-CAST provides guidance to HP on essential development and support requirements. HP-CAST meetings include briefings by HP executives, HP technical staff, industry analysts, partner briefings and lectures by HP customers on their state-of-the-art computing facilities. The meeting includes invited academic, government and research keynotes, as well as cloud and grid keynotes.

Two special focus sessions are planned:

"Energy Efficient HPC and Scalable Computing Solutions"

"Beyond Classical HPC-Massive Scale-Out Systems for Social Media".

In addition, there are numerous tutorials, SIGs and Collaboration Sessions.

No membership is required to attend HP-CAST meetings. The fall meeting is scheduled to occur prior to the beginning of the Supercomputing 2009 conference, thus allowing for efficient travel.

HP-CAST President

Prof. Rudolf Lohner, KIT Germany
